

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, JUNE 19, 2006 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3

CURRENT SITUATION:

Initial attack activity was light nationally with 98 new fires reported. Seven new large fires (*) were reported, two in the Southwest Area, three in the Southern Area, and one each in the Eastern Great Basin and Northwest Areas. Four large fires were contained, two in the Eastern Great Basin Areas, and one each in the Southwest and Rocky Mountain Areas. Very high to extreme fire indices were reported in Alaska, Arizona, Kansas, Utah, Colorado, Nebraska, New Mexico, Nevada, North Dakota, Texas and Wyoming.

SOUTHWEST AREA INCIDENTS/LARGE FIRES:

BRINS, Coconino National Forest. A Type 1 Incident Management Team (Broyles) has been ordered. This fire is two miles northeast of Sedona, AZ in timber. Evacuations are in effect for Oak Creek Canyon and two northern Sedona Subdivisions. Extreme fire behavior was reported.

RIVERA MESA, Las Vegas District, New Mexico State Forestry. A Type 2 Incident Management Team (Lineback) has been ordered. This fire is 7 miles north of Ocate, NM in timber, grass, ponderosa pine and scrub oak. Limited access is hampering containment efforts. Extreme fire behavior was observed.

RESERVE COMPLEX, A Type 1 Incident Management Team (Whitney) is assigned. This fire is near Reserve, NM in ponderosa pine, pinyon pine, juniper and grass. Hot, dry conditions, difficult terrain and limited access are impeding containment efforts. Numerous residences, commercial property, archeological sites, and critical wildlife habitat areas remain threatened. Line construction and line preparation for burnout operations continue. Active fire behavior with torching and spotting was reported.

SKATES, Gila National Forest. A Type 1 Incident Management Team (Dietrich) is assigned. This fire is 12 miles northeast of Silver City, NM in timber. Numerous residences remain threatened. Evacuations remain in place for Upper Mimbres Valley and Lake Roberts areas. State highway 35 remains closed. Moderate fire behavior was observed. Burnout operations continue.

BEAVERHEAD, Apache-Sitgreaves National Forest. This fire is 15 miles south of Alpine, AZ in timber. An evacuation order has been lifted. Isolated torching and minimal spread were reported.

NAVAJO MOUNTAIN 1, Navajo Regional Office, Bureau of Indian Affairs. A Type 1 Incident Management Team (Oltrogge) is assigned. This fire is 35 miles northwest of Page, AZ in timber. Remote difficult terrain and low relative humidity are impeding containment efforts. Single tree torching, downhill backing fire and active fire in the interior were reported.

POTATO COMPLEX, Apache-Sitgreaves National Forest. A Type 2 Incident Management Team (Raley) is assigned. This complex is ten miles northwest of Heber-Overgaard, AZ in pinyon pine, juniper and grass. Some interior torching was reported.

WARM, Kaibab National Forest. A Fire Use Management Team (Hahnenburg) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource

objectives. The fire is burning three miles south of Jacob Lake, AZ in ponderosa pine litter. Some residences and commercial property remain threatened. Structure protection and evacuation planning are continuing. The fire is burning adjacent to Arizona highway 67 and causing some delays. Increased fire behavior and spotting were observed. There was significant movement of the fire to the north and east.

GLADSTONE COMPLEX, Cimarron District, New Mexico State Forestry. This complex, comprised of 14 fires, is 21 miles southwest of Clayton, NM in grass, pinyon pine and juniper. No new information was reported.

WEST, Kaibab National Forest. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. This fire is burning eight miles southeast of Tusayan, AZ in ponderosa pine and brush. This will be the last narrative report unless significant activity occurs.

WILLOW, Coronado National Forest. This fire is 15 miles south of Sonita, AZ in grass. No new information was reported.

BAR, Kaibab National Forest. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning 20 miles southeast of Grand Canyon Village, AZ in pinyon pine, juniper, grass and brush. This will be the last narrative report unless significant activity occurs.

HARDING COMPLEX, Las Vegas District, New Mexico State Forestry. This complex, comprised of seven fires, is near Mosquero, NM in grass, pinyon pine and juniper. No new information was reported.

SOUTHERN AREA INCIDENTS/LARGE FIRES:

CANADIAN, Texas Forest Service. A Type 2 Incident Management Team (Hannemann) is assigned. The Team is also managing the Rocker B Complex, Glass Mountain Complex and Bean Ranch fires. This fire is 40 miles south of Dalhart, TX in grass and brush. Active fire behavior with flame lengths up to eight feet and group torching was observed.

HWY 54 COMPLEX, Texas Forest Service. This complex is one and a half miles northwest of Romero, TX in grass and brush. A power line serving El Paso, and residences are threatened. Active fire behavior with flame lengths up to eight feet and spotting was reported.

ROCKER B COMPLEX, Texas Forest Service. This complex is 17 miles north of Barnhardt, TX in grass and brush. Minimal fire behavior was observed.

GLASS MOUNTAIN COMPLEX, Texas Forest Service. This complex is 15 miles northwest of Marathon, TX in grass and brush. Spotting and rapid rates of spread were reported.

BEAN RANCH, Texas Forest Service. This fire is 15 miles southwest of Biglake, TX in grass, brush and juniper. Active fire behavior with flame lengths up to five feet and some torching was observed.

ALASKA AREA INCIDENTS/LARGE FIRES:

PARKS HWY, Fairbanks Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This fire is one mile southeast of Nenana, AK in black spruce, tundra and grass. Numerous residences, recreational cabins, commercial property and utility infrastructure remain threatened. Structure protection is in place. The fire remains active on the east flank, with isolated torching in the interior. Light smoke due to inversion is minimally impacting several communities.

NAGEETHLUK RIVER, Galena District, Bureau of Land Management. This fire is west of Anvik, AK in black spruce and tundra. No new information was reported.

OUTLOOK:

Red Flag Warnings: In Eastern Great Basin Area for Monday for most of Utah for strong southwest winds and low relative humidity. In Western Great Basin from 1100 to 1900 due to gusty winds and low relative humidity in east-central Nevada.

Fire Weather Watches: In Eastern Great Basin Area for Monday strong, gusty winds and low relative humidity along the Arizona Strip. In Southwest Area for strong winds and low humidity in much of northern Arizona and New Mexico.

Weather Discussion: Winds will be increasing over the intermountain west as an upper trough moves across the Pacific Northwest and the upper ridge of high pressure shifts east of the Rockies. Scattered showers and thunderstorms are expected to continue in the Alaska interior as a moist southeast flow aloft persists over the state.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<p>Southwest Area Mostly sunny, very warm and dry. Partly cloudy across parts of central and western New Mexico. Windy to breezy across both northern Arizona and New Mexico.</p>	90 to near 110 lower elevations. 70 to 90 mountains.	5 to 15% most areas, except 15 to 25% portions of west Texas.	Southwest 10 to 20 mph with higher gusts northern Arizona and northern New Mexico. South to southeast 10 to 20 mph and gusty eastern New Mexico and west Texas.
<p>Eastern Great Basin Area Idaho, Bridger-Teton: Partly cloudy. Scattered thunderstorms mountains and Upper Snake Plain.</p> <p>Northern Utah: Partly cloudy, dry and windy. Isolated thunderstorms northeast Utah.</p> <p>Southern Utah, Arizona Strip: Sunny, hot and windy.</p>	<p>Idaho, Bridger-Teton: 55 to 75 mountains. 70 to 83 valleys.</p> <p>Northern Utah: 75 to 88 mountains. 85 to 104 valleys.</p> <p>Southern Utah, Arizona Strip: 75 to 88 mountains. 88 to 104 valleys. 103 to 113 low deserts.</p>	<p>Idaho, Bridger-Teton: 25 to 40% mountains. 20 to 30% valleys.</p> <p>Northern Utah: 15 to 25% mountains. 5 to 15% valleys.</p> <p>Southern Utah, Arizona Strip: 8 to 18% mountains. 4 to 10% valleys.</p>	<p>Idaho, Bridger-Teton: Northwest to west 10 to 20 mph and gusty east and central Idaho; Southwest 15 to 20 mph with gusts to 35 mph east Idaho and western Wyoming.</p> <p>Northern Utah: Southwest 20 to 30 mph with gusts to 40 mph possible in northeast Utah.</p> <p>Southern Utah, Arizona Strip: Southwest 20 to 30 mph with gusts to 40 mph possible.</p>
<p>Alaska Area Mostly cloudy with scattered showers across the state. Chance of thunderstorms in the interior and northern south central.</p>	60s to around 80 in the northern interior.	30 to 40% in the interior and northern south central. Above 40% in the east, south and southwest.	Southerly winds 10 to 20 mph across the state.
<p>Southern California Morning coastal fog, otherwise sunny.</p>	75 to 90 mountains. 85 to 95 valleys. 95 to 100 upper deserts. 100 to 110 lower deserts.	20 to 35% coastal areas. 15 to 30% valleys. 10 to 25% mountains. 5 to 15% deserts.	Southwest to northwest 5 to 15 mph.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Western Great Basin Area Mostly sunny and warm.	N. valleys: 74 to 92. S. valleys: 90 to 110. N. mountains: 65 to 76. S. mountains: 81 to 86.	N. valleys: 10 to 18%. S. valleys: 4 to 10%. N. mountains: 15 to 22%. S. mountains: 6 to 12%.	Generally west to southwest at 10 to 15 mph with afternoon gusts 30 to 40 mph across northern and eastern Nevada.
Rocky Mountain Area No information was reported.			
Southern Area No information was reported.

Building Fireline Downhill With Fire Below

As a general rule, construct line moving uphill. Many firefighters have lost their lives attacking wildland fires from above. If there is no practical alternative to constructing line downhill, proceed only after weighing the following considerations:

- Has the area been scouted for fire perimeter and behavior? Discuss what you need to know about the fire perimeter and fire behavior before building fireline downhill with fire below.
- Will wind direction be at your back? Will it stay at your back? Talk about how winds can change when you are on a slope (e.g., time of day, upslope and downslope breezes, etc.).
- Is the area free of chimneys and gullies? How would you negotiate your line location if there were chimneys and gullies below where you needed to be working?
- Are there adequate safety zones and escape routes as you progress downhill? How do you maintain adequate safety zones and escape routes as you progress downhill?
- Can you carry your burnout downhill as you go to provide an anchor point and safety zones? Discuss how you decide when to carry the burnout with you or wait until you have tied in down below.
- Have lookouts been posted? What do the lookouts need to be on the watch for?
- Do you have good communications, especially with lookouts and crews working towards you? What are some of the dangers of not communicating with lookouts and crews working towards you? What are the benefits of maintaining good communications?
- Can the line be completed and burned out before the fire reaches the line? Discuss how this would affect where you locate the line.
- Do you have adequate resources to complete the assignment? What additional resources might you need to safely take on an assignment that includes building fireline downhill with fire below?
- Is aerial support available if needed? What benefits can aerial resources provide? What might be an added danger from aerial resources in this type of situation? (Common Denominators)
- Is aerial support available if needed? What benefits can aerial resources provide? What might be an added danger from aerial resources in this type of situation? (Common Denominators)
- Has everyone been briefed on the assignment, fire behavior, weather, communications, escape routes and safety zones, hazards and tactics? Discuss who might provide this briefing and where and when it might occur.
- To reduce the risks:
If the answer is "no" to any of these questions, consider other tactics and provide for safety first.
Never compromise escape routes to safety zones for the sake of building line. Remind everyone that a situation check is each and every firefighter's right and responsibility.
